Exercise 2 - Git Multi commit

01

Lets Code

Make a webpage(index.html) names of your 5 favourite skills

02

Add to Github

Push the code to Guthub - master branch

03

Lets code again

Make a new branch "skills" , create 5 different pages with name of each skill, and describe that skill in that page

04

Push again

Commit again and Push your code in new branch

05

Pull Request + Merge

Merge the code from new branch - skills to master

06

Switch back to master in local

Pull the merge code back

07

Make a new Branch and Push

Create a new branch - make changes in index.html (add your name and email) finally push it again to git and merge it to master.

Don't forget to add your link to sheet
